

Class 41: Terraform Each

rg_name ek variable hai

rg_name

Without Loop

rg_name=var.rg_name

Without Loop + List

```
resource "azurerm_resource_group" "rg" {
  name     = var.rg_names[0]
  location = "centralindia"
}
```

With Loop

input

count+ List

```
rg_names=["angelone-rg1", "angelone-rg2", "angelone-rg3",
          "angelone-rg4", "angelone-rg5"]
```

```
resource "azurerm_resource_group" "rg" {
  count
  name     = var.rg_names[0]
  location = "centralindia"
}
```

Count index ke lie chalta hai aur
for_each list ke element ke lie
chalta hain

Delete karte time gadbada jayenga

for_each+ List

```
rg_names=["angelone-rg1", "angelone-rg2", "angelone-rg3",
          "angelone-rg4", "angelone-rg5"]
```

```
resource "azurerm_resource_group" "rg" {
  for_each=toaset(list_names)
  name     = each.value
  location = "centralindia"
}
```

Delete wala problem solve..

5 rg ek hi location me bana rhe
ho toh bna sakte ho..agr alg alg
region me banane hai toh nhi
ban payenge

for_each+ Map

Map variable

```
rg_names={
  key=value
  key=value
  key=value
}
```

json

```
rg_names:{
  key:value
  key:value
  key:value
}
```
